## Web Developer (WordPress & Full-Stack Projects)

Qide Ltd 

09/2019 – 02/2025 | Helsinki, Finland

- Collaborated with designers, SEO specialists, and project managers to deliver 30+ WordPress websites for EU SMEs.
- Developed custom WordPress themes and plugins while also building dynamic front-end components using JavaScript and React.
- Boosted PageSpeed Insights scores from 60 to 95+ (40% improvement) by implementing advanced WP-Rocket configurations and image WebP conversion.
- Customized WooCommerce stores with custom checkout flows, product filtering, and multi-language support.
- Integrated third-party REST APIs, payment gateways, and automation systems to streamline client operations.
- Led client technical consultations and translated business needs into scalable WordPress architecture.

## WordPress Developer

EverlastIT 

11/2020 – 10/2022 | Prague, Czech Republic

- Led migration of 8 legacy WordPress platforms to modern stack (PHP 8+, optimized MySQL), preserving 100% indexed SEO rankings and improving average session duration by 18%.
- Increased website performance scores from 60 to 95+, reducing load time from 3.2s to under 1.4s across multiple client projects.
- Designed and launched 10+ high-conversion websites across ecommerce, SaaS, and real estate sectors.
- Implemented advanced caching, database optimization, and code refactoring strategies to improve overall system stability.
- Served as technical lead for complex site migrations and performance optimization initiatives.
- Coordinated efforts with cross-functional teams of 3–6 developers, designers, and SEO specialists to deliver projects on schedule.

## WordPress Developer Intern

ItRestart

09/2019 – 11/2020 | Bishkek, Kyrgyz Republic

- Engineered 15+ responsive front-end interfaces using Bootstrap, reducing cross-browser compatibility issues by 25%.
- Resolved 20+ bug reports and plugin conflicts across 5 client sites, maintaining 99% uptime during active development sprints.
- Optimized on-page SEO for 8 websites using Yoast — improving average meta coverage from 60% to 95% and reducing image load weight by 40% via WebP conversion.
- Managed technical requirements for clients to gather requirements and implement requested features.
